

Henkel Corporation

Salisbury, North Carolina

New MFO Plant

Perigon provided all engineering and design for this 91,500 sf manufacturing and distribution facility which was built to consolidate processes from several other Henkel sites. Perigon prepared all specifications for new equipment, P&ID's, Piping, Civil / Structural, HVAC, and Electrical design. Civil design for the project encompassed 13 acres of virgin property requiring new entrance roads, storm water management and a major stream crossing. The buildings incorporated F min. 60 floors within the warehouse, a three-hour fire rating between building occupancies, employee locker rooms, lunch canteen, and management offices. The project met a 6-1/2 month design completion target within budget.

- \$17 million Total Installed Cost
- Process, Piping, Civil, Structural, Architectural, and Electrical
- 60,000 square foot Warehouse and 31,500 square foot multi-level Process Area
- Planned completion May 2010
