

Bausch & Lomb

Greenville, South Carolina

Administration Building

Perigon provided detailed architectural design and construction administration services for this building addition to the existing bottle filling plant in Greenville, South Carolina. The stylish glass atrium connects the new offices and laboratories to the existing manufacturing plant. Perigon prepared all construction and permitting documentation including the initial Basis of Design package.

- Two story, 25,000 square foot facility
- Architectural, HVAC, Electrical, and Civil design
- \$4 million total installed cost
- Glass atrium connects the new building to existing manufacturing plant
