

# Invista (formerly KoSa)

Shelby, North Carolina

## Packaging Automation

Perigon has completed 100s of projects for the Invista (formerly KoSa, Trevira, Hoechst Celanese) plant in Shelby, North Carolina since 1991.

One of our feature projects for this client was a complete automation of the plant's Filament Bobbin transportation, tracking, and packaging systems. State-of-the-art Packaging Robotics, Automatic Guided Vehicles, and Package Conveyor Systems, were employed to improve Kosa's product packaging efficiency and reduce operational costs. Perigon also provided information system engineering / programming for a new bobbin tracking system which improved warehouse storage and retrieval. Testing Lab enhancements were included.

- \$6 million TIC
- Mechanical, electrical, controls, programming, construction management
- Packaging Robots, AGV Systems, Packaging Conveyors, Warehouse Automation
